MERN Stack

The MERN stack is a popular web development framework comprising MongoDB, Express.js, React, and Node.js. It enables efficient and dynamic full-stack application development.

ExpressJS

Fast and minimalist web application framework for Node.js.

ReactJS

JavaScript library for building dynamic user interfaces.

NodeJS

Server-side
JavaScript runtime
for building
network
applications.

TypeScript

Superset of JavaScript adding static typing and enhanced tooling.

NoSQL database for scalable, flexible data storage.
